- 40% off frames and prescription lenses (on complete package)
- 10% off contact lenses
- 40% off safety frames and prescription lenses

My Preferred Brand Medications

Your plan may reimburse your prescription at the generic level, however, you may, due to medical reasons, require the brand name version.

InnoviCares provides you and your family supplementary coverage for many brand name medications providing them at similar prices to their generic alternative – plus the program offers additional savings on many other healthcare products. Access to brand medications such as Altace, Crestor, Nexium and Plavix, etc. are offered through innoviCares.

RxHelpONE allows you to stay on brand name medications, at little or no additional cost. The program gives you access to multiple medications, from multiple brand manufacturers on ONE program. It is easy for you, and your pharmacist. Example drugs available under the RxHelpONE program include Lipitor, Lyrica, Nasonex, Zoloft, etc.
