How to access savings at the pharmacy, optical and eyewear locations

The first time you use this plan, tell the pharmacy or optical location that you have a Preferred Pharmacy Agreement set up under your employer benefit plan.

For optical products, the discount will be calculated when the order is placed. If the discount is for a *family* member, you must be present and present the required ID.

Present your benefit drug card to any of the participating Loblaw's pharmacy locations when getting a prescription filled to ensure the appropriate discounts will be applied.
